## Railsletters

De railsletters zijn bedoeld om de motorische ondersteuning van de teken-klank koppeling tot stand te brengen.

Kinderen trekken de letters over met een wisbordje of afgedrukt op papier en spreken meteen de klank uit.

De stoplichten geven de schrijfrichting aan:

Groen: potlood op papier en starten in de richting van de pijl.

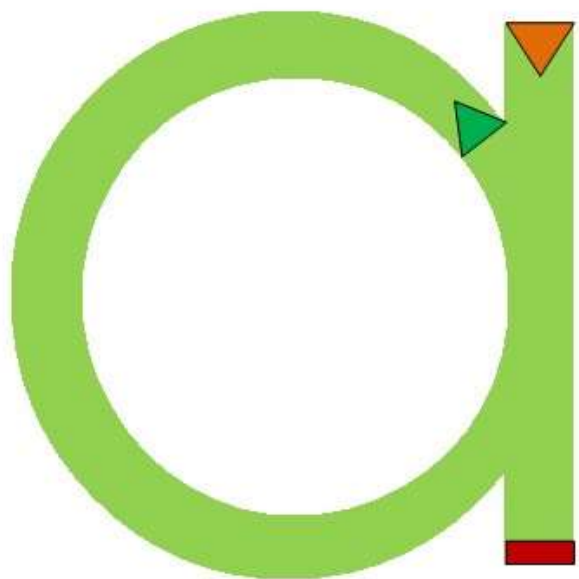

Oranje: van richting veranderen of even over je papier vliegen (zoals bij de letter f)

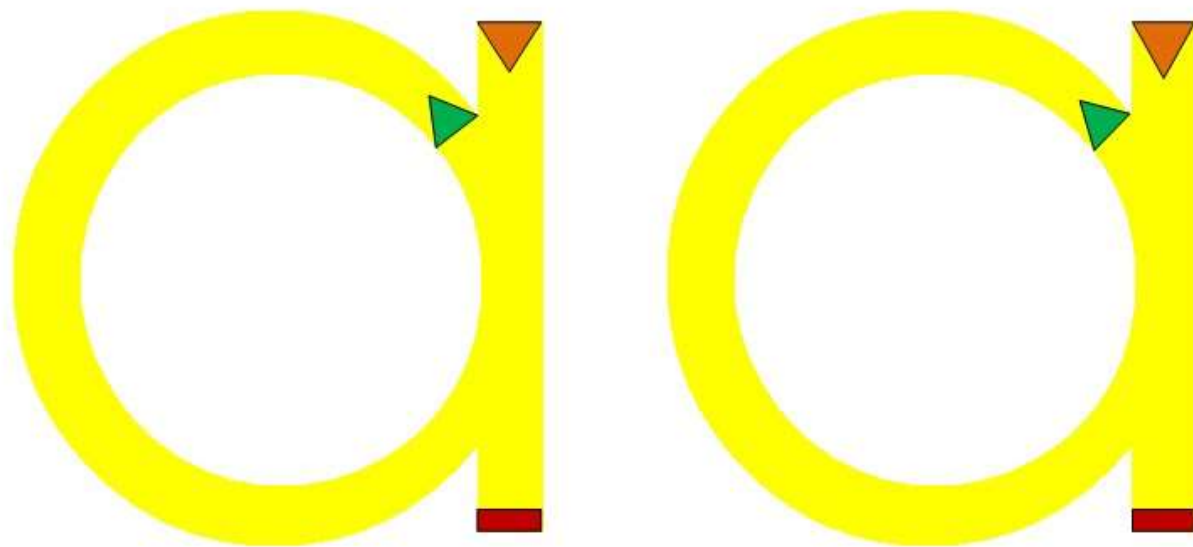

Rood: stop en haal je potlood van het papier.

De kleuren van de letters corresponderen met Taal in Blokjes.
